

# Pham Thi Ngoc Quynh

## Front-end Developer

I'm an experienced website developer who focuses on building engaging and accessible digital experiences—things that look good but are well-built under the hood.

### Experience

**Thang Loi Group, HCMC** | <https://thangloigroup.vn>

Frontend Developer | Dec 2020 - Present

- Built key **Internal Business Management Toolkit** features using React and TypeScript, including Human Resource portal, Goal & Task Management, Document Management, E-Signature & Workflow Automation Platform, Asset Management, Call Center & CRM Integration Platform and other digital products.
- Researched and developed a company design system, using design principles, creating reusable UI components, templates, and documentation to standardize the look and feel across applications.
- Built various event-focused web apps to support events, including event booking platforms, digital magazines, minigames for company events, and sports tournaments.
- Collaborated with cross-functional teams to deliver refined digital solutions.
- Mentored 3+ frontend development interns, providing technical guidance and training on HTML, CSS, JavaScript, and Git.

**FIOP JSC, HCMC**

Frontend Developer | Sep 2019 - Jun 2020

- Developed, and maintained for client website primarily using HTML, CSS, Javascript, and jQuery.
- Developed a landing page for a company's website and a mobile application - an individual assistant aimed at financial management and giving advice.
- Technologies: NextJS; React Native.

### Projects

**Internal Business Management Toolkit** | Thang Loi Group

<https://ngocquynhpham.com/project/thangloigroup>

- Developed an end-to-end web application frontend serving as an internal business management toolkit. The application streamlines employee lifecycle management, contract handling, attendance tracking, payroll processing, asset control, document management, digital asset management, workflow automation, etc.
- Built using modern React for an efficient, user-friendly frontend combined with an intuitive UX and integrated with RESTful API to transform and optimize core business operations, enabling the organization to manage its resources, processes, and data more effectively.

**Online Running Tournament** | Outsource Project

<https://chayvituonglaixanh.com.vn> (Expired)

- Developed an event-focused web application to host a community running tournament. Built using HTML CSS JS and leveraging the Strava API to retrieve real-time activity data for tracking runner performance. The platform promotes a green lifestyle through physical activity while supporting local charities.

**Tan Son Nhat International Airport Customer Rating** | Outsource Project

<https://tia.wincore.asia/customer-review>

- Gathering customer feedback collection via QR code scanning throughout the airport. Integrating with the airport's API, the app provides real-time flight info, indoor navigation, and automated notifications to improve traveler satisfaction.
- The project has been rolled out at Tan Son Nhat International Airport.

### Skills

#### Programming Languages

JavaScript, TypeScript.

#### Web Technologies

HTML5, CSS/SCSS

#### Libraries & Frameworks

ReactJS, ReactContext, Zustand, Tailwind CSS, Bootstrap.

#### Tools & Platforms

Git, GitHub, Figma, Jira, Notion, Adobe Illustrator, Adobe Photoshop

#### Soft Skills

Communication, Teamwork, Problem-Solving, Analytical Thinking, Technical Mentorship.

#### Others

UI/UX Research & Design, RESTful APIs.

### Education & Certificate

**DIA ACADEMY, HCMC**

UI/UX Designer  
2022

**University of Science - VNUHCM**

Information Technology  
2017 - 2021

### Languages

#### English

Reading & research.  
Basic communication.
